---

## PROFESSIONAL SUMMARY

A reliable, approachable, hard-working, and self-motivated individual who takes pride in completing tasks to a high standard. Known for punctuality, adaptability, and rapid skill development. With a solid background in the automotive and construction industries, problem-solving skills have been honed and are now being applied to software development. Currently pursuing studies in management, economics, and statistics at university while undertaking courses and personal projects in software engineering and data engineering.

---

## PROJECTS

### Software Developer, 02/2024 - Current

#### Personal Project - [compareproducts.wlozimierrr.co.uk](https://compareproducts.wlozimierrr.co.uk)

- Developed website and mobile app for building product comparison, automated scrapers, data cleaning, indexing, and CI/CD pipeline.
- Next.js front end, using Tailwind CSS and Shadcn UI.
- Nginx and Certbot for web server and SSL certificates.
- Mobile App with Next JS, Ionic, Capacitor and Tailwind CSS.
- Automated Python scrapers for B&Q, TradePoint, Screwfix, and Wickes, containerized and hosted on AWS EC2, integrating Lambda, EventBridge, and AWS Simple Email Service.
- PostgreSQL on AWS RDS with Algolia Search for advanced indexing.
- CI/CD with GitHub Actions, AWS ECR, and Docker.
- Set up Prometheus and Promtail to pass logs and metrics from every scraper, and display this data on a custom-made Grafana dashboard.
- Grafana, Prometheus, Loki, Promtail, Cadvisor, and Node Exporter for telemetry monitoring solutions.
- Check out more detailed info at [github.com/wlozimierrr/CompareBuildingProducts\\_Scrapers](https://github.com/wlozimierrr/CompareBuildingProducts_Scrapers)

### DevOps Engineer, 08/2024 - Current

#### Personal Project - Raspberry Pi

- Configured and implemented firewall security.
- Installed and configured Docker and Docker Compose for containerized applications.
- Managed and optimized Docker Compose files and networks for efficient service orchestration.
- Deployed and hosted WordPress websites and Compare Website within Docker containers.
- Set up a secure WireGuard VPN tunnel between a Raspberry Pi (on a guest network) and an EC2 instance, eliminating the need for open ports on the router.
- Deployed and managed Docker Socket Proxy and Node Exporter to gather real-time metrics and improve system monitoring.
- Set up EC2 instance monitoring services, running Prometheus, Homepage, Portainer, and Alertmanager for comprehensive system monitoring and management.
- Established WireGuard connections to laptop and mobile phone for secure, remote access to a Homepage App.
- Configured Caddy as a reverse proxy to securely manage hosted websites, the homepage URL, and SSL certificates.
- Implemented OAuth authentication via Caddy, restricting access to the homepage URL exclusively to a designated email address for enhanced security.

---

## EDUCATION

---

- **Bachelor of Arts:** Business Management With Economics 09/2022 - Current  
Open University - Milton Keynes  
Completed a Statistics module in the first year with distinction. Currently on track to attain either a First or a 2:1 final grade.
- **Full-Stack Engineering:** HTML, CSS, JavaScript, Git & GitHub, React, Node.js, Express.js, SQL, Data Structures, Algorithms 06/2023 - 05/2024  
Codecademy - Distance Learning
- **Business Intelligence Data Analyst:** SQL, Pandas, Matplotlib, Seaborn, Tableau, Excel 01/2024 - 09/2024  
Codecademy - Distance Learning

## SKILLS

---

- Ability to work well with others and independently using my initiative
- Strong analytical and problem-solving skills
- Self-motivated and results-driven
- Excellent written and verbal communication skills
- Proven ability to build and maintain customer relationships
- Jupyter Notebooks
- Source Control (GIT, GitHub)
- Operation System (Windows, Linux)
- Microsoft Office (Word, Excel, PowerPoint)
- Software Development Methodologies (Scrum)
- Frontend (React, NextJS, Angular)
- Backend (Express JS, Node JS, Python)
- Cloud Computing (AWS, GCP)
- Database Management (SQL, NoSQL, PostgreSQL, MongoDB)
- Python (Flask, Scikit-Learn, Pandas, PyTorch, TensorFlow)
- JavaScript, TypeScript
- Web Scraping (Requests, Selenium, Scrapy, Puppeteer)
- Data Analytics (Python, Minitab)
- Data Structures and Algorithms
- Telemetry (Grafana, Prometheus, Loki, Promtail)
- Web Servers (Caddy, Nginx)
- Testing (Jest, Swagger, Postman)

## AFFILIATIONS

---

- Weight Lifting, Boxing, Running
- Financial Markets
- Books (Psychology, Biographies, Technicals)

## LANGUAGES

---

- English - Fluent
- Polish - Native
